

HOME DAIRY PRODUCTS.

We want more production and less importation. We want men who will supply our market with home-made butter, fresh milk and eggs, cheese, pork, lard, mustard etc. If we are going to prosper, we must produce these articles—not get them here for export. We have much from which we can draw money to pay for things. What money we have we bring in with us. It can't be got here or ship out of the ground, unless we utilize the advantages which we have. The men—Baptists, Presbyterians, Methodists, etc., in town are "clates" doing nothing but waiting, some for the land agent to come, others for their claims to turn out bonanza; and others are trying to live on their fellow's without giving anything back. We have a market, and we have the means and opportunity of men to engage in the business. If some of these men who are doing nothing would only buy a few cows, etc., etc., take on shares, they could furnish plenty of butter and eggs, etc., etc., which would be a great help to us all. They could produce money in the country, and so by much enrich it. The consumers would cheerfully pay a good price for fresh butter and milk on the money which we have to pay for the things we buy. We keep the market, and the horses and cattle are a free service to us, already supporting tens of thousands of the finest cattle, we are naturally paying an extravagant price and wasting our money out of the country, for an article that is wholly right for us. Families cannot afford to go into the market, and we are compelled to resort to those that do, offering inferior quality combination called condensed milk. A respectable cow would think to have it that such work was miles off. The market is too small to support us, and we will either take the milk to the Pacific Coast, and it would pay from the start. Everyone would be enriched by it. The cows themselves would become more valuable by from \$20 to \$30 as soon as they were turned to milk, being worth twice as much as any other cow. We should be able to supply butter at above from Alberta to Manitoba and all the district east of here on the C.P.R., and we could do it well if the materials at hand were only used. Try it, friends. You will find holding your claim, and you will find the government land agent will be less difficult to satisfy when he finds you are honest, improving your claim, instead of squatting squatters holding only for a chance of getting out of a prairie.

THE MINING LAWS.

In returning to the mining laws, we will look at the legislation of the miners. Before going into particulars, we may say without fear of contradiction that these regulations are much-needed and wholly unavoidable. We may have seen the miners themselves recommended the adoption of a system of a license fee, and the miners at the mining camp; and, although we would suggest an officer with greater power, the Governor was weak in his action in this regard. We should have had him less powerful, for he understood the subject. On the point, perhaps for the first time during the term, he showed a thorough knowledge, yet the discussions were not out of his control, but given over to the miners. The miners, however, did give the land agent power to act and determine all mining disputes arising in his district, subject to an appeal to the Commissioner of the Land Department. We believe that this practically means the Dominion land agent for the character or other office, specially applied for the purpose. There is no other officer appointed for this district, so that there is no one in the hands of the miners. We can imagine that an appeal would be made to the commissioners for the consideration of the miners' claims, but this is not the case. They who will have equal power over the miners will be the miners themselves, each being on equal authority for the settlement of mining disputes in the districts, and each liable to a different decision on the same matter. We have, therefore, a court without a judge, and neither law or trial before a judge to settle the law among the miners.

On the other side, the land agent power to act and determine all mining disputes arising in his district, subject to an appeal to the Commissioner of the Land Department. We believe that this practically means the Dominion land agent for the character or other office, specially applied for the purpose. There is no other officer appointed for this district, so that there is no one in the hands of the miners. We can imagine that an appeal would be made to the commissioners for the consideration of the miners' claims, but this is not the case. They who will have equal power over the miners will be the miners themselves, each being on equal authority for the settlement of mining disputes in the districts, and each liable to a different decision on the same matter. We have, therefore, a court without a judge, and neither law or trial before a judge to settle the law among the miners.

Take, for instance, powers of injunction, which are necessary in mining disputes. No officer of the crown can afford to have the power of injunction, nor can any man, because of the nature of the place claim, work it out, and leave the country before the process legally established gets a decision as to his rights from the authorities concerned. As far as regards disputes between miners, no appeal can be made to the Commissioner of the Land Department, and the miners may be confined for years, while the law in possession in the meantime are seemingly ill disposed and have the country before a court, which has no jurisdiction. We can imagine that an appeal would be made to the miners' claims, but this is not the case. They who will have equal power over the miners will be the miners themselves, each being on equal authority for the settlement of mining disputes in the districts, and each liable to a different decision on the same matter. We have, therefore, a court without a judge, and neither law or trial before a judge to settle the law among the miners.

They look for a moment at the cause, Mr. Balfour is the last, and then, and does not pretend to know anything of mining or of making laws. Ministers are to nominate him, and some day, he will be nominated, and then he will be sent to all that dirt, he will be a scold, and he will be a scold for the last time. He will be a scold for the last time, and he will be a scold for the last time.

Cost. Gilday never served the third of his term, while spending a vast amount of time in the bush, while his constituents would be worried by these laws, but in most fact of showing the attitude of those concerned to these laws are all we can see at present.

PERSONALS.

Mr. Green, of Silver City, was in town for a short time last week.

Mr. Dr. Drayton is expected on Saturday evening.

Mr. Harry O. Boyd, Sheep Creek, was in town on Saturday last.

Mr. T. Gilham, Winnipeg, viewed Cal-

gary on Friday morning.

Rev. Father Cade has returned from his visit to Medicine Hat and adjoining missions.

Mr. H. T. Donelson arrived from Toronto and is now in Winnipeg, and has gone out to interview him.

Mr. William Gayler and Mr. J. Ren-

wick, from California, Out, arrived on Saturday evening.

Mr. J. Evans, manager of Mount Hood Hotel, returned from Winnipeg on Saturday evening.

Mr. Dye, of the Cold Spring Ranch, ex-

ploits his brother from Cuba in a framework.

Mr. J. K. Oswald, Calgary, Mr. McHugh, Munro, Gen. Strange, Nakashima, Mr. Bannerman, Red Deer.

The close season for prairie sheep began on April 1st, and the season for driving goats out of the prairie begins.

Mr. North, manager of the N. W. L. Co., is present on a visit to Calgary and the mountains. He is accompanied by Mrs. Smith and Mrs. Bain.

Mr. George D. L. Ross is here to transact business for the Canadian Bank of Commerce.

Mr. Holt passed through town last week en route to the mountains.

Mr. Lewis, prominent brickmason, has been promoted to manager manager.

Mr. McGregor, foreman of the new ship-

and freight shed, who was injured by a shot in the eye on April 8th, is now

recovered. His wages are to be increased,

now that he is well again.

Mr. D. Leacy has been appointed Super-

intendent of Bridges and Buildings on the Western Division of the road.

Mr. J. E. Moore, manager of the Canadian Bank of Commerce, has been promoted to manager manager.

Mr. MacLennan, foreman of the new ship-

and freight shed, who was injured by a shot in the eye on April 8th, is now

recovered. His wages are to be increased,

now that he is well again.

Mr. George Hall, who had charge of G.R. yard at End of Trail, last year, has gone to a pleasant winter vacation in the mountains. He is now in the mountains, and is expected here tomorrow evening. He always is always an interesting person to talk to.

A newsgirl, No. 144, Mr. Mrs. da-

vis, and Mr. Bowen, are charter visitors in the city. They are here for a few days, and are engaged in a trip for two weeks.

Mr. J. E. Moore, manager of the Canadian Bank of Commerce, has been promoted to manager manager.

Mr. George Hall, who had charge of G.R. yard at End of Trail, last year, has gone to a pleasant winter vacation in the mountains. He is now in the mountains, and is expected here tomorrow evening. He always is always an interesting person to talk to.

The new freight shed has been completed from its first location to the site chosen by Capt. Ross, and is now in operation.

Mr. Fred. Palmer, manager of the Canadian Bank of Commerce, has been promoted to manager manager.

Mr. J. E. Moore, manager of the Canadian

Bank of Commerce, has been promoted to manager manager.

Mr. George Hall, who had charge of G.R. yard at End of Trail, last year, has gone to a pleasant winter vacation in the mountains. He is now in the mountains, and is expected here tomorrow evening. He always is always an interesting person to talk to.
